

Munich Quantum Valley Education in Bavaria Doctoral Fellowship Program

Call for Applications 2022

7+ fully funded PhD positions

in Quantum Science and Technology in Bavaria, Germany

The Munich Quantum Valley (MQV) Initiative aims to establish Quantum Computation and Quantum Technologies in Bavaria, Germany. Its doctoral fellowship program invites applications for **PhD fellowships starting in the summer or fall of 2022.**

Successful applicants receive an **ad personam** fellowship - they may freely seek to join any research group involved in research on Quantum Science and Technology at any Bavarian university.

Fields or research covered by MQV include **atomic physics and quantum optics, solid-state physics and material science, quantum information theory, and quantum many-body systems.**

The MQV fellowship program is committed to recruiting extraordinary students from diverse backgrounds and meeting them with openness and respect. **We explicitly encourage female candidates to apply and welcome students from all countries!**

Applicants must have completed a Master's degree (or equivalent) with very good grades by the end of September, 2022. All fellowships are fully funded for three years and there are **no tuition fees.**

For a short video on MQV (mostly German, with English subtitles), see here:

apply online

Deadline for application is **Feb 1st, 2022**
