The **Munich Center for Quantum Science & Technology (MCQST)** is funded by the German Research Foundation (Deutsche Forschungsgemeinschaft, DFG) under Germany's Excellence Strategy (EXC 2111 - 390814868).

MCQST Support Map

Diversity

Open atmosphere & Equal Opportunity

To capacitate taking care of **children or family members**, MCQST offers **childcare** at all events and supports **flexible working hours**.

The **MCQST Mentoring Program for women** addresses excellent PhD students and Postdocs to work with **international or local mentors** from either academia or industry.

To support minorities we offer **individual coaching and training**.

Unconscious bias trainings, such as talks, workshops and coachings aim to sensitize all MCQST members to inequality and discrimination issues.

Equality

Nurturing young talents & enabling independence

The **MCQST Diversity in Leadership Program** gives participants the opportunity to reflect and develop their own **management skills and leadership values**.

The **Master Course on Quantum Science and Technology (QST)** - offered jointly by **LMU** and **TUM** - is open for students with a Bachelor's degree in physics, mathematics, chemistry, informatics and engineering. It covers all areas of QST from basic research to applications.

Building a future in QST

The **MCQST Summer Student Program** invites international **undergraduates** to join one of our research groups in Munich for four weeks. Don't worry, most of the expenses will be covered by us!

Bachelor

PostDoc

To increase the number of female scientists in QST, the MCQST awards **two Distinguished Postdoc Fellowships** per year to outstanding female postdocs.

With its **300 000 € budget** the **START Fellowship** enables PostDocs to establish **their own research project** over a period of two years.

Excellent Research & Innovation

To trigger and support **exceptional and unorthodox emergent ideas** all MCQST members can apply for flexible **Seed Funding**. Joint projects with industry partners are welcome.

A monthly **colloquium**, **international conferences** and a **guest program** support scientific exchange and the connection of MCQST with the world.

Distinguished Lecturer awards are given biannually to outstanding scientists in the field.
